Regeneus Ltd (ASX: RGS) – Quarterly results for the period ended 30 June 2016

The Company's Appendix 4C – Quarterly Cash Flows is attached.

The financial highlights for the quarterly reporting period included:

- Achieved better than targeted net operating cash flow for the quarter. Cash outflow for the quarter was again \$1.44 million. Cash flow is tracking consistently better than the quarterly target of \$1.70 million.
- The quarterly cash outflows for the financial year, excluding R and D Tax Incentive of \$3.4 million received in October 2015, are as follows:

- September quarter	\$1.55 million
- December quarter	\$1.47 million
- March quarter	\$1.44 million
- June (current) quarter	\$1.44 million

On July 1 the company signed an R&D funding arrangement for \$2.0 million. This facility forward funds, via a loan, the Federal Government's research and development tax incentive for FY16. The facility allows the company to draw down up to \$2.0 million to be repaid upon receipt of the incentive. Current estimates of the incentive are in excess of \$2.5 million and consistent with prior years, should be received FY17 quarter 2.

The facility provides funds required for ongoing development while the company finalises the licensing of its Progenza mesenchymal stem cell therapy technology for the Japanese market.

Cash position as at 30 June 2016 is \$0.53 million (31 March \$1.97 million).

It is anticipated that the current funds including Federal Government's research and development tax incentive will support Q1/Q2 FY17 with the anticipated funding arrangement from the Japanese partner providing longer term support.
